## Ready for Maths

For Grades 1 to 8

**Ready for Maths** is a series of textbooks for foundation stage, preparatory and middle stages created in accordance with the **NEP (2020)**, and the revised **National Curriculum Framework (NCF, 2023)**. **Ready for Maths** series is graded to ease learning and assimilation of concepts and their applicability in day-to-day life. Concepts are explained in a lucid manner with supporting illustrations wherever required. This series is a result of strong thoughts with the panel of experienced teachers and educationists in the field of book making, as their recommendations have been incorporated by the authors.

The competencies and skills to be developed are linked to the learning outcomes. The content across the grades are linked to the **17 SDGs laid down by the United Nations**. Additionally the series also ensures that children become aware of the Indian heritage in the field of Mathematics. Also, every chapter across grades has a separate section for STEAM education which aims to provide children with a better-rounded knowledge base.

This book is carefully designed and written using child-friendly language, pictures, and context to guide the young minds to observe, experience and explain mathematics all around them. Each Mathematical concept is introduced in step-by-step manner using **Concrete–Pictorial– Abstract** approach with the help of various math tools. The book aims at helping the children to learn through interesting activities and competency-based questions given in each chapter.

## SALIENT FEATURES

- ▶ **Concrete-Pictorial-Abstract** approach in each chapter.
- ▶ **Misconception** helps students to understand the common mistakes.
- ▶ **21st Century Skills**-based questions in every Break Zone.
- ▶ **Break Zone** are the practice problems given after every topic, where questions are marked with complexity level from simple – medium – complex.
- ▶ **STEAM Link** help students to connect the topic to Science, Technology, Engineering, Art, and Math.
- ▶ **Math Around Us** help students to develop kinesthetic skills.
- ▶ **Project** help students to reinforce math concepts.
- ▶ **Indian Heritage** help students to understand the heritage of India by knowing about great Indian mathematicians and Vedic Math.
- ▶ **Math Lab Activity** help enhance the learning of concepts using math manipulatives.
- ▶ **Check Your Understanding** provides practice and drill.
- ▶ **Warm Up** enables students to check their previous knowledge.
- ▶ **Problem Solving** develops students' problem-solving skills.
- ▶ **Check Your Competencies** in every Break Zone section help the students develop competency in concepts.
- ▶ **Value based** questions
- ▶ **Case study-based** questions

## Steam Ahead with Science

For Grades 1 to 8

**Steam Ahead with Science** is a well-curated series for grades 1 to 8. It is a well thought out and planned endeavour to change the outlook of young learners towards learning of Science. It enables the learners to understand and apply scientific principles and scientific knowledge to their daily life. The concepts presented in a lucid manner enable them to have a better grasp of the content. They cultivate the ability to predict, hypothesise, analyse and draw conclusions. The series has appropriately graded text with supporting illustrations and images. An inquiry based approach helps the learners move from the concrete to the abstract and find answers. Rational thinking is encouraged and curiosity is built through exploratory activities and experiential learning. Scientific facts and knowledge are integrated with other curricular areas using a project approach. The series is completely aligned with the recommendations of the *National Education Policy 2020* and the curricular goals as defined in the *National Curriculum Framework 2023*. The competencies and skills to be developed are linked to the learning outcomes. The content across the grades are linked to the **17 SDGs laid down by the United Nations**.

## SALIENT FEATURES

- ▶ **Tune On** – in every book of grades 1 to 5, a warm up activity mainly cultivating observation and inquiry
- ▶ **Activity** – linked to any of the competency skills helps ingrain the understanding of a concept in an interesting manner
- ▶ **Think** – a statement asking learners to find answers to lesson related concept
- ▶ **Quick Check** – in between the content short and quick assessments
- ▶ **Keywords** – gives meanings of difficult words in a chapter
- ▶ **National Pride** – in grades 6 to 8 brief and crisp information related to ancient Indian knowledge system or an achievement (related to the concepts in the chapter)
- ▶ **Amazing Information** – fun-filled interesting additional information
- ▶ **Curricular Integration** – in grades 1 to 5 books project-based learning
- ▶ **Cartoon Study** – in every book of grades 1 to 5 a separate page explaining key grade specific concepts through interesting cartoons
- ▶ **Indian Achievements in the Field of Science** – end of the book separate pages on Indian Nobel Laureates in the field of Science and other Indian achievements in Science including Artificial Intelligence, Robotics and achievements by Indian Space Research Organisation
- ▶ **Green Soldiers and Climate Warriors** – separate pages in grades 3 to 5, brings together the people and organisations whose efforts have made significant impact on environmental protection either in India or across the world
- ▶ **Discoveries in Science** – a separate page of 10 interesting and amazing discoveries in every book of grades 1 to 5, and 1 discovery related to a topic in every chapter in grades 6 to 8
- ▶ **Scientific Discovery** – one interesting and amazing discovery in every topic (in grades 6 to 8)
- ▶ **SDGs** – in grades 6 to 8, 3 separate pages covering the 17 SDGs laid down by the United Nations

Additional features of the book include information on Scientific Discoveries, Amazing Science facts, Indian Science Achievers and National Pride. Values and dispositions in the larger interest of the society are encouraged by way of questioning and the appreciation of the Indian knowledge systems is specially engrained in the form of added information.

## Earth Matters (Environmental Studies) For Grades 1 to 5

**Earth Matters** is a well-curated EVS series for grades 1 to 5. It is a well thought out and planned endeavour to change the outlook of young learners towards learning of Science. It enables the learners to understand and apply scientific principles and scientific knowledge to their daily life. The concepts presented in a lucid manner enable them to have a better grasp of the content. They cultivate the ability to predict, hypothesise, analyse and draw conclusions. The series has appropriately graded text with supporting illustrations and images. An inquiry based approach helps the learners move from the concrete to the abstract and find answers. Rational thinking is encouraged and curiosity is built through exploratory activities and experiential learning. Scientific facts and knowledge are integrated with other curricular areas using a project approach. The series is completely aligned with the recommendations of the *National Education Policy 2020* and the curricular goals as defined in the *National Curriculum Framework 2023*. The competencies and skills to be developed are linked to the learning outcomes. The content across the grades are linked to the **17 SDGs laid down by the United Nations**.

## SALIENT FEATURES

- ▶ **Tune On** – in every chapter begins with a warm up activity mainly cultivating observation and inquiry
- ▶ **Activity** – linked to any of the competency skills helps ingrain the understanding of a concept in an interesting manner
- ▶ **Think** – a statement asking learners to find answers to lesson related concept

The series follows a carefully designed curriculum that caters to learners of various abilities and learning styles, ensuring inclusivity and engagement for all students.

06

**Short Stories, Poems, and Proverbs:**  
The series includes short stories, poems, and proverbs, providing students with a diverse range of literary experiences and cultural insights.

05

# AUTHOR PROFILE

## L'Hexagone

**Short Description:** Hailing from Mahe, a former French colony, Rejula Charoth's fascination with the French language and culture began at an early age, nurtured by her education in a French school. Today, she is a passionate author and an experienced educator with over 15 years of teaching experience across various schools in Kerala, Tamil Nadu, and the UAE. Channeling her deep love for the French language and culture, Rejula has dedicated herself to crafting the engaging and comprehensive "L'Hexagone" series.

## Rejula Charoth

## Charles Baker English Grammar and Composition

For Grades 1 to 8

The **Charles Baker English Grammar and Composition** series has eight books for grades 1 to 8. In the ever-evolving landscape of education, India's National Education Policy and National Curriculum Framework stand as beacons of transformation, drawing inspiration from the timeless concepts like "Panchadi" and "Panchkoshas". These visionary frameworks herald a new era of learning, emphasizing on holistic development, critical thinking, and adaptability while finding resonance with the profound insights inherent in these traditional Indian concepts. As we embark on this journey of empowering educators and learners alike, we proudly present the series – a collection designed to align with the principles and aspirations set forth by the NEP and NCF. We believe that grammar, often seen as a foundational skill, can be a gateway to a rich understanding of language and beyond.

"Panchadi", the five levels of teaching in ancient Indian pedagogy, recognized the individuality of each learner and aimed to nurture their physical, emotional, intellectual, and spiritual dimensions.

This holistic approach is mirrored in the NEP's emphasis on holistic education, which encourages the harmonious growth of the cognitive, emotional, social, and ethical facets of a student. The series is crafted with a similar intent, striving to address the "Panchkoshas" – the five sheaths of human existence – as we delve into the layers of language mastery.

Aligned with the NCF's learner-centric education, the series respects the diversity of learners and their unique developmental stages. Just as each "kosha" represents a layer of consciousness, our series strives to engage learners on multiple levels, catering not only to their linguistic, cognitive, but also nurturing their creative, emotional, and ethical dimensions. Through interactive exercises, real-world examples, and collaborative activities, we aim to nourish the entirety of a learner's being.

The series is a testament to our commitment to the ideals of the NEP and NCF, infused with the wisdom of "Panchadi" and the depth of "Panchkoshas." It invites educators, students and lifelong learners to embark on a transformative odyssey where grammar is not just a set of rules but a conduit to unveil the layers of human potential.

## The Grammar Garden

For Grades 1 to 5

**The Grammar Garden** is a graded grammar series that uses the **functional approach** to English grammar teaching. Moving away from the traditional emphasis on the structure of grammar and placing the focus on **language as a skill** is the hallmark of this series.

The series adheres to the *National Education Policy 2020* and has been divided into **foundational stage** and **preparatory stage**.

## SALIENT FEATURES

**Functional approach** to teaching grammar  
Introducing concepts through **usage first**, before **giving the definitions**  
**Key concepts highlighted as text graphics** to capture the learner's attention  
Comprehensive exercises to reinforce **grammar-in-use**

Examples from everyday life to highlight **language as a skill**  
**Periodic Tests** for the learners to assess what they have learnt  
A **comprehension section** in Grades 1 and 2 to further underscore the use of grammar in overall language

## My Reading Tree

For Grades 1 to 5

**My Reading Tree** series has five books for grades 1 to 5. The series provides the child with delightful and endearing stories and poems. The seed of learning is laid when the books are in the hands of the child. This habit of reading when nurtured, will grow this precious seed into a sapling and into a mighty oak.

The pieces chosen cover a wide range of well-loved tales, folk tales, classics, modern tales, wit and humour. The themes chosen comply with both the NCF and NEP. The content has been well-chosen by a team of authors who have been English teachers and know their readers well.

### SALIENT FEATURES

- ▶ Learning made fun, interesting and effortless
- ▶ Chapter-wise detailed theory plus questions
- ▶ Practice questions at the end of every chapter
- ▶ Use of conventional and contemporary teaching methods
- ▶ Balanced picture-text ratio across grades
- ▶ Participative Learning Methods used through activities at the end of every chapter
- ▶ Introduction to nearby environment and surroundings by vivid examples provided in the chapters

## Online With Computers

For Grades 1 to 8

Online with Computers is a series of eight books for grades 1 to 8. The series has appropriately graded text with illustrations for the learners. The books are completely based on Windows 7 and MS Office 2010 with relevant screenshots to support the related texts. The books use the interactive approach which attracts the young readers into actively participating in the learning process. The series apart from adhering to the National Education Policy 2020 attempts to inculcate in the young minds behavioural skills such as sharing and cooperating in the laboratory.

A journey through the series will expose the learner to a range of well-structured material and instructions at every step of all types of operations including the basics about online shopping.

## SALIENT FEATURES

- ▶ **Computer Etiquette** – teaches computer etiquette in a child friendly manner
- ▶ **Cool Tip** – gives students useful tips on the various options available for different operations
- ▶ **Must Know** – gives some essential points which a student must know
- ▶ **Check Your Knowledge** – In-text exercises to assess and reinforce learning
- ▶ **Now You Know** – summarises the main points of the chapter for quick recapitulation
- ▶ **Key Terms** – gives important terms a student comes across in a chapter along with their definitions
- ▶ **Useful Shortcuts** – provides time-saving keyboard shortcuts for menu commands
- ▶ **Exercises** – provide a large variety of questions to comprehensively assess students on the theoretical understanding of the concepts learnt
- ▶ **In the Lab** – provides situation-based practical questions to be tried hands-on
- ▶ **Teacher's Note** – helps teachers to make the chapter more meaningful and interesting for students
- ▶ **CD** – provides animations to aid explaining the practical portions of the subject matter explained in the books and interactive exercises to assess the understanding of the concepts taught

# Small Little Footprints Series

(Early Childhood Education Foundation Stage Pre-kg)

## COURSE BOOK
